# Create a showstopping event

No two event is the same, so we always price each event based on the specific details and needs. Contact us today for a comprehensive quote. While we do dry-hire stages, we do not offer dry hire options on any other equipment. All events are crewed by our experienced technicians.

## Stage options

Our Stagemobil trailer stages are fast to set up and perfect for one-day events. We can also provide modular stage deck for smaller stage options, runways or accessible viewing platforms.

## State-of-the-art PA systems

For most of our events, we use point source speaker systems from KV2. This modular and compact system means we can set up quickly and provide festival quality sound for audiences up to 5,000.

## Lighting and pyro for extra sparkle!

We design and quote for lighting accordingly. We can provide a dynamic set with our LED batens, moving heads, pixel panels, spots and floods. We also have cold-spark, smoke machines and confetti cannons for that showstopping moment.

## Screens and event streaming

Our stock includes 65" and 85" LED screens. We can also include LED Walls from our preferred suppliers. Relay live cameras to screen and live streaming options available.

## Start/finish gantry

We provide event packages to many participation and charity events requiring start-finish gantry. This can be built to any spec with branding options.

## Event management and planning

We want every event to run smoothly, which is why we're always happy to answer questions or give advice on how your event should be managed. On the day, you can trust our team to manage the stage content and ensure slick timing.
